

KEY QUESTIONS

the big six

How much ODA does Norway provide?

Norway is committed to continue spending 1% of its GNI on ODA

Driven by Norway’s economic growth, ODA volumes are expected to increase in coming years. The ODA budget for 2018 is set at US\$4.1 billion (NOK35.1 billion). In 2016, it spent US\$4.4 billion (in 2016 prices), or 1.12% of its gross national income (GNI), making Norway the largest donor in relation to the size of its economy. Norway has reached the UN 0.7% target since 1976 and is committed to maintaining ODA at 1% of its GNI. It has consistently met this commitment since 2013.

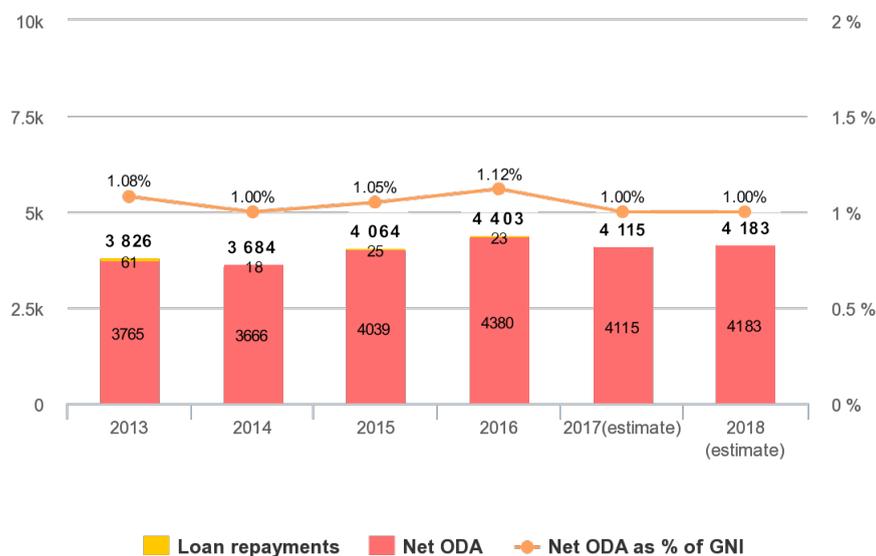

In 2015, a particularly high number of asylum seekers reached Norway (31,150, according to the Norwegian Directorate of Immigration). This has impacted ODA funding in two major ways: reallocations of funds from development programs to cover the costs of hosting refugees, and higher volumes of reported ODA, driven by addition-

al refugees-related costs outside of the ODA budget. In 2015 and 2016, in-country refugee costs made up respectively 11% and 18% of total ODA.

Starting in early 2016, Norway’s restrictive refugee policy – as well as tighter border controls in Europe – led to a sharp decrease in the number of asylum seekers (3,460 in 2016 and 3,500 in 2017), the lowest number since 1997. This has taken pressure off the ODA budget. For 2018, the budget to cover the costs of hosting refugees in Norway is set at NOK1.4 billion (US\$164 million). This is significantly lower than the NOK2.9 billion (US\$345 million) budgeted in 2017. Looking forward, these costs are expected to decrease further as a result of Norway’s stricter policy on asylum.

To compare ODA levels in any given year with ODA levels provided in other years, figures need to be adjusted to account for inflation and exchange rate fluctuations. The OECD provides data that accounts for these fluctuations. In this profile, and unless indicated otherwise, figures are stated using 2016 prices.
